LEUCINE	4.19%
HISTIDINE	0.75%
ARGININE	3.61%

INGREDIENTS: Animal Protein Byproducts, LysineSulfate, Termin-8, and Santoquin (330ppm).

BACKGROUND

SUMMARY

H.J. BAKER'S PRO PLUS[®] animal protein concentrates are a family of high-protein concentrates customized to fit the precise needs of the nutritionist and the live production manager.

We developed this product in response to feed industry demand for the same inherent qualities as our PRO-PAK[®] protein concentrate – uniformity and nutrient density – but at a lower cost.

H.J. BAKER'S PRO PLUS[®] animal protein concentrate has earned its reputation for being extremely uniform and a very high-quality “no-frills” protein concentrate. It is often used as replacement or supplement in feed-grade poultry meal in broiler rations.

And because it is easily customized, nutritionists use this remarkable product to “fine tune” their rations – hitting their optimal target nutritional levels without expensive nutrient overages or shortages.
