PRESS RELEASE

For Immediate Release

H.J. BAKER EXPANDS INTO GUADALAJARA, MEXICO

WESTPORT, CONNECTICUT, USA – (April 8, 2009) – H.J. Baker & Bro., Inc. announces that its newly established Mexican subsidiary, H. J. Baker & Bro. de Mexico S de R.L. de C.V., has opened an office in Guadalajara to meet increased demand for H.J. Baker feed ingredients, fertilizer and sulphur products and Tiger-Sul Products sulphur-based fertilizers in Mexico, Central America and South America.

Christopher V. B. Smith, President & CEO of H.J. Baker stated: “Although, H.J. Baker products are well known in Mexico, increased demand for our products necessitated the creation of a local presence including a strategically located office there. This way we are ensuring that H. J. Baker customers throughout this important international region receive the support and service they have come to expect.”

Smith continued: “Our Mexican company’s Guadalajara office will provide sales and service to agriculture, phosphate fertilizer producers and dairy, cattle and poultry feed markets in Mexico. “

The Mexican and Central American agricultural industries have long benefited from H.J. Baker’s expertise with feed ingredients. H.J. Baker’s proprietary products include H.J. BAKER’S PRO PLUS® animal protein concentrate, PRO-PAK® protein concentrate, and PRO-LAK® dairy by-pass protein. These feed ingredients are industry leaders in nutrient density and, for the southern markets, will be produced in dedicated non-ruminant manufacturing plants in the United States.

H.J. Baker & Bro. de Mexico S de R.L. de C.V. also expects to be involved in supplying sulphur to the leading producers of phosphate fertilizers in Mexico and Tiger-Sul proprietary fertilizer products: TIGER 90CR® sulphur and TIGER MICRONUTRIENTS® fertilizers. This Mexican subsidiary and its new office will streamline all aspects of operations in the southern markets ensuring the service and quality H.J. Baker is known for throughout the industry.

H.J. Baker & Bro., Inc. and its affiliated companies have provided high quality ingredients to the fertilizer, feed and sulphur industries since 1850.
